

Problem Solving – GRASS Approach

- Use the **GRASS** approach to the solving of problems.
- **G** = list the **given** information from the question
- **R** = state what it is that you are **required** to find or calculate
- **A** = **analyze** the question and state the relation(s)/equation that apply to the problem
- **S** = **solve** the problem
- **S** = **statement**, express your final answer in a complete statement
